

Seicane SC19 DAB+ Receiver USB Manual

Product Preview

DAB, short for Digital Audio Broadcasting, is a system of broadcasting radio programmes using digital technology.

Compared to DAB, this DAB+ is the upgraded version to provide better operation and greater performance in receiving signal. It features amazing improvement on the interface problems and signal noise. Different from analogue FM radio, it can offer high-quality sound and more programs for you. The automatic tuning also makes it very convenient for car drivers on the way. For radio lovers and music enthusiasts, it is one of the best choices on a long trip.

Note: This Android USB interface DAB+ receiver can only be compatible with Android System.

Product Parameters

- Working Voltage: 5 V
- Operating Temperature Range: -20 to 70 °C
- Storage Temperature Range: -40 to 80 °C
- Signal to Noise RF= 72dBm: Mini 50 dB
- Distortion at Ref out RF= 72dBm: Mini 1%

Product Features

- Elegant & portable design: Designed as the mini shape, it is fairly easy and convenient to carry everywhere you like.
- High-fidelity sound: Loaded with the latest audio technology, it provides the CD-like quality sound without any distortion. The high-fidelity sound enables you to enjoy an amazing in-car experience.
- Multiple channel choices: The wide frequency bandwidth is great to offer multiple channels to you, making it so convenient and easy to get access to your favorite programs.
- Faster switching radio stations: The fast speed to switch to different radio stations will absolutely impress you, and you are able to listen to your beloved station within the least time.
- Detailed channel information: Song titles, music type and news or traffic updates are all available for you to get the real-time information.

How to Install

1. Install the related DAB APK file on the car stereo. To download and install the APP, you can click: https://drive.google.com/open?id=1L5KkNMy_j7b7ukQGVPGTzapzpwX9Cp27
2. Make the car stereo USB interface to dock with the DAB+ receiver interface, and then well place the DAB+ receiver (please confirm that it is not blocked by the obstacle).
3. Open DAB+ receiver and it will search automatically.

Precautions for Use

1. Firstly, you have to install the APK file that is matched.
2. This product does not support thermal plugging, i.e. when the DAB+ receiver is in operation, after the USB port is disconnected, it must quit APK and re-enter APK before it is reconnected with USB port. Otherwise, it won't work. Or it will search repeatedly or has no search.
3. Please do pay attention to the installation of the antenna: improper installation of the antenna will directly affect the acceptance of DAB.

The antenna below is an antenna with edge glass. It should be installed to attach the copper foil to the iron sheet of the column A, then the installation effect is good, well hidden and has beautiful decorative effect.

Tear off the protective film on the back of the antenna.

Open the front A column soft bag and then attach the copper foil to the A column, and make sure the other parts are also attached. Then pull the wire to the glove compartment and pack the car's A column.
