Notice: To avoid Short-circuits, please stall your car and disconnect ACC and B+ before installation.

Product Introduction

- High sensitive capacitance touch screen with multi-point induction
- Super 8 GB of storage memory
- Perfect compatibility with driving records,after reversing
- Built-in functions: GPS Navigation,WI-FI,DVD player ,Radio,Bluetooth, USB/SD etc.
- OS version:Android 4.4
- Support the latest android 4.2.2 and 4.4 system with audio and video wireless transmission,cellphone could be synchronization with the DVD,still more show the charm of science and technology era.
- Navigation: fully support all major navigation software in the market,, free to set the navigation path, select the priority of the navigation voice.
- Can choose different start-up screen, support multiple languages
- User interface designed by a professional team, transparency, multiple innovation
- System software, Specially optimized GUI design, ultra-fast and dazzling drag effect, comparable to the smooth operation of the Android system experience
- Specially optimized OS,start-up quickly, with multiple protection program, and never lost; the module re-power on at each boot, memory optimal, zero risk.
- FM radio: Support in Europe, Australia, South America, North America, Russia, Japan and other global radio system.
- CAN: CAN protocol, Can display reversing radar, air-conditioned state, FM show etc info.
- Capacitance screen ,fluency operation

Front-Panel function

- MIC :Microphone
- Radio:Click to switch radio interface
- DVD:Click to access the DVD interface
- GPS:Click to access the navigation interface / Long press to corrected
- BT:Click to access the BT interface
- SD Card Slot: Insert SD card for Map or for files
