1. CAUTIONS

1.1 NOTES

We reserve the right to modify or improve the designs and specifications of our products at any time without notice.

To ensure this product can operate normally, please use the accessories included.

1.2 About device

1. The device should be installed by professional technician or maintenance man. Dismount or repair the device without permission is forbidden.
2. The function of back-up camera is only for the reversing, our company has no business if the reversing accidents happen.
3. For your driving security and avoid violating traffic rules, please do not watch programs and do the operation during driving.
4. The routes and navigation information display through the device is only for your reference. Sometimes it can't show the latest professional road style, road situation, single line, road closed or traffic district situation.
5. Please ensure you along with the manual, and take it as your reference of operation and safe information.

1.3 About DVD

1. Please don't use the discs below 12cm diameter (12cm not included) or irregular shaped discs.
2. Please don't use the discs with dirt, dust, scratched or twisted.
3. The entrance of discs must be keeping clean. When having the dust, please make it clean with soft mop. The using of dusted discs will reduce the device playing effect, causing the discs unread or discs can't be existed. However, this situation is not the fault of the machine.
4. Playing the DVD on badly bumpy road or nonstandard order or badly damaged disc will destroy the chapter when driving the car.

2. Basic Operation

3. Function Operating Introduction

3.1 Interface Icons' Function Instruction

3.1.1 Main Interface One

Click  into Navi function

Click  into 3G APN

Click  into Language Setup

Click  into RDS Setup

Click  into Calendar checking function

Click  to know more about device

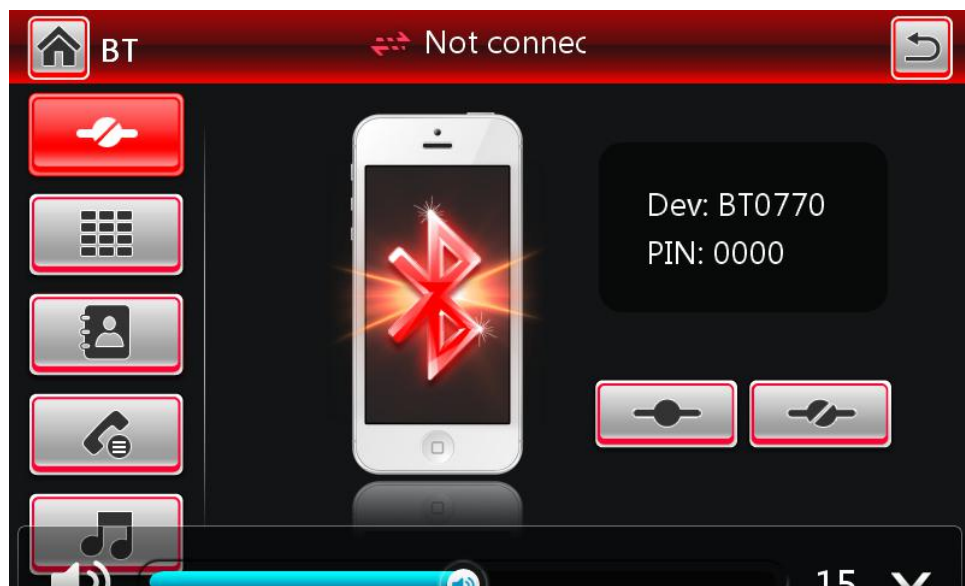

3.1.2 Main Interface Two

Setup Options:

-  Setup Wallpaper
-  Boot Logo
-  Setup Common function
-  Setup Display
-  Setup Sound
-  Setup Steering Wheel Control
-  Click into Video function
-  Click into BT function

3.2 BT Hands-free Function Operation

Click interface icon  or press the BT keys on panel to enter BT function.

3.2.1 BT Matching Connection

When Using the BT Hands-free function, it must be connected with phone and do the match first.

Operation: Open the phone's BT function and do the BT device searching. Different units have different device number. When searching the same device number on phone, click to match. The connection is successful when the icon turns blue.

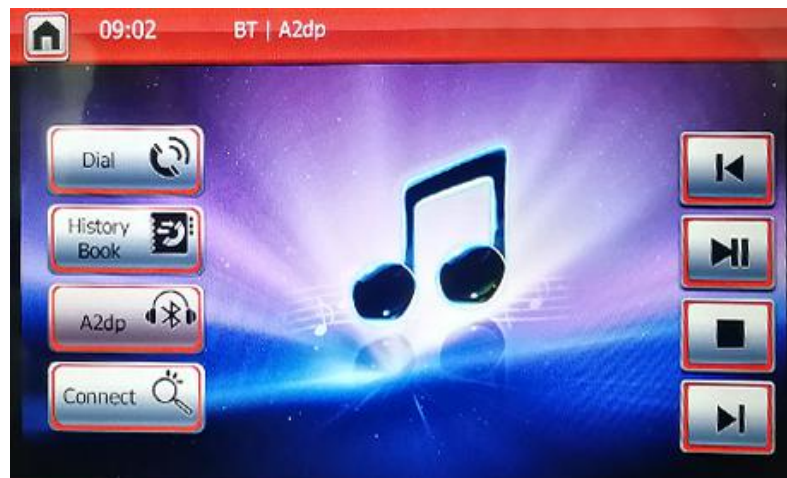

Eg: The device name is BT4688, when searching that number on phone, do the matching.

Notes: phone connecting code is: 0000

After the connection, users can do the calling through the device's dialing interface.

3.2.2 A2DP Function

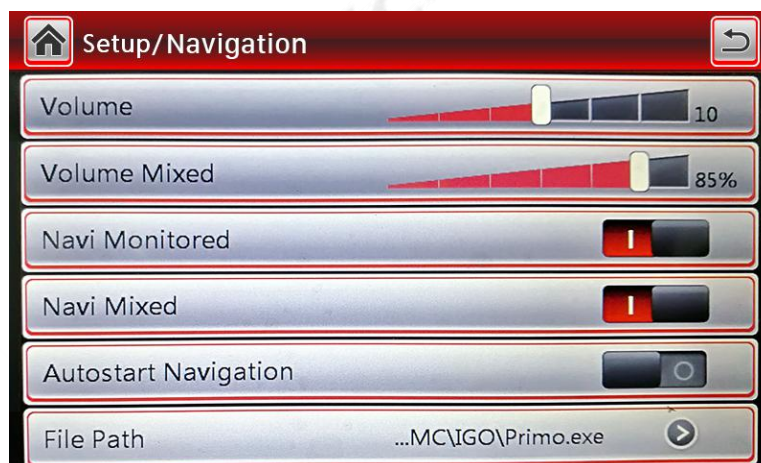

If phones support BT music playing function, we can play phone's music on device through transmission between phone's audio and car's loudspeaker system.

4. Navi Route Setup

When first inserting navi card, we must setup the navi route and finally the navi function will run.

Operation: Click icon "setup" on main interface, choose "navi operation", and then click the file one the end. Back to the main interface, and click the "navi" icon to enter navi function.

Notes: If the navi card is not ours, please make sure the map port is correct, or else it will not work. Our map is COMI 9600.

5. Steering Wheel Learning

The system supports original steering wheel control. If the original steering wheel has the control keys, please setup your key functions as below:

Operation:

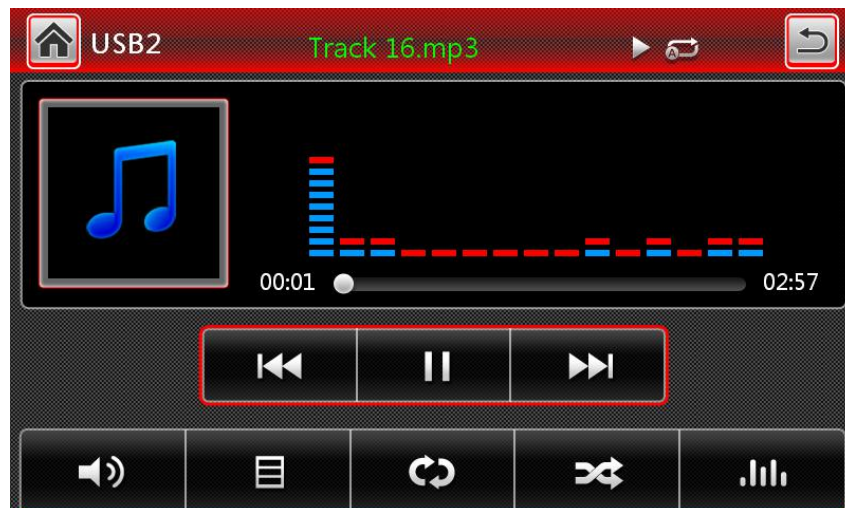

1. Click "Clear all" to clean all the history records.
2. Click to setup functions with related buttons, and then the button will turn to flicker.
3. During that button is flickering, press the steering wheel button to setup that function.
4. When the BEEP rings and that button turns green, that means it has been setup successfully.
5. Repeat 2-4 times to finish all the key's learning.

6. Radio Function

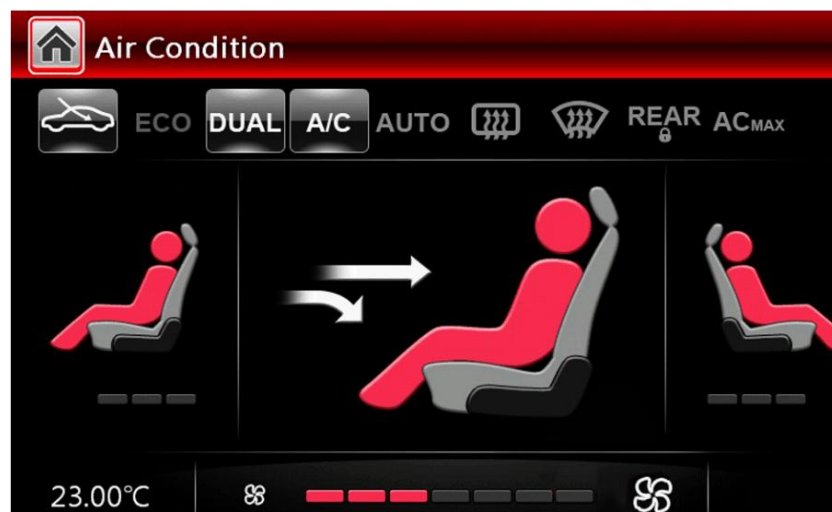

7. SD/USB Playing Function

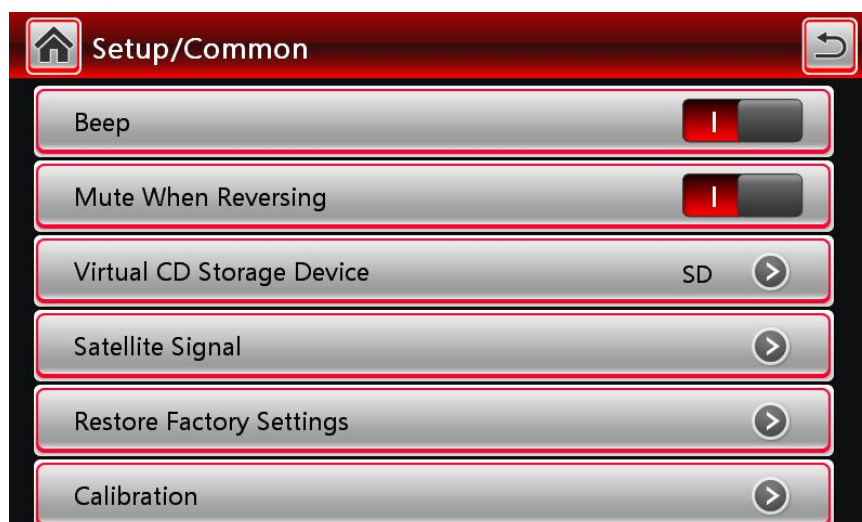

Support audio/video file playing

8. Air-conditioning Information Display
