Safety Notes

- **Speaker Connection Notes**

- ① Please do not connect the speaker to the metal or chassis of the car.
- ② Please do not connect the speaker wires to each other.

- **Power Cable Notes**

If you would like to have another devices connected to this unit, you should confirm that the car circuit capacity is bigger than the overall fuse capacity of all connected devices.

- **Rear-view/ Reversing Camera Connection Notes**

- ① First of all, please consult the local driving rules and regulations, and to understand whether the law requires installing of rear-view reversing camera or not. You'd better arrange a professional technician to help you install the rear-view reversing camera or make the connections.
- ② After the connection of the rear-view reversing camera, you are enabled to see the car rear situation through the screen. This function will help you reverse safely, especially when you are driving a big car.

Installation of the Car Radio

The instruction will not be applied for all kinds of cars. Therefore, if your car has different needs, please make the appropriate adjustments. If you have any questions about mounting kit, please feel free to contact us at sales@seicane.com.

- **Pre-Installation Notes**

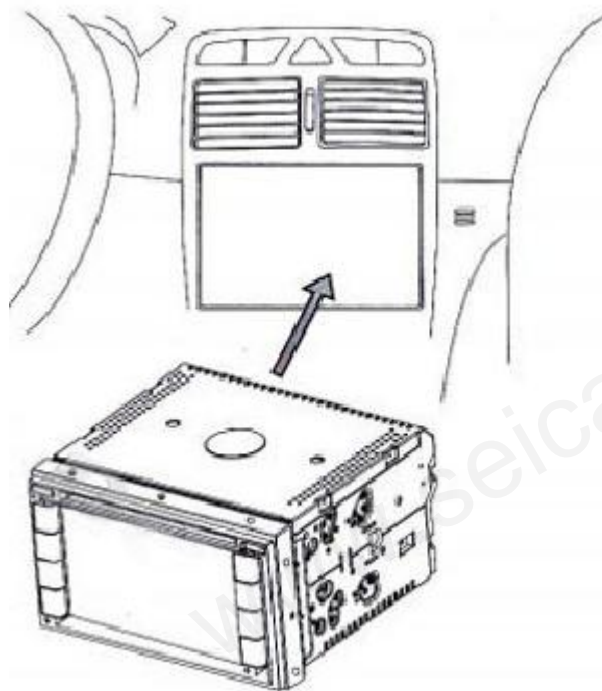

- ① This product is used for the vehicle with 12V battery and negative end. Before the installation, please check the battery voltage.
- ② Before connecting, please ensure that the ignition is off so as to avoid short circuit.
- ③ Connect the yellow and red power cable at last.
- ④ Confirm that all loose wires are isolated with electrical tape.
- ⑤ Do not tangle the wire when you tighten the moving parts (such as seat rails).
- ⑥ Confirm that all GND is connected to the same place.
- ⑦ Using the improper fuse may cause damage of fire, thus, when you replace the fuse, please don't hesitate to consult a professional technician.

- **Installation Instruction**

- ① If the car is not equipped with car devices or navigation unit, please disconnect the car negative battery terminal. However, when the car is equipped with car

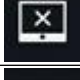

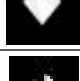

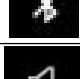

devices or navigation unit, it will lose the data if disconnect the car battery. If the car battery is still connected, in order to avoid short-circuit, you should confirm that the bare wires do not touch each other.

- ② Removal control area of the decorative panel.
- ③ Check the cable connection again according to the rear seat wiring diagram.
- ④ Carefully view ICA when opening tilt angle to check the car, make the host enter the Central District according to the tilt angle. It is finished until you hear a “click” sound.
- ⑤ Install the decorative panel again (Without a decorative panel, you have no need to perform this step.)
- ⑥ Reconnect the car negative battery terminal. As shown below.
